NSU Campus Email Alert

From: **Office of Information Technology (OIT)**
To: **NSU Students & Faculty/Staff**
Subject: **Conficker**

Conficker Internet Worm

The Conficker Internet Worm was due to activate today, download its instructions and unleash its malicious payload.
NSU is proud to announce that its network and computers are free from this infection. The Security Team has been working around the clock to identify and eradicate Conficker from the NSU network. A scan security of all Student, Faculty/Staff and Server computers connected to the NSU network returned negative yesterday for Conficker infection.
The Security team would like to thank all the students, faculty and staff for their collaboration and efforts in thwarting this threat.
You can read more about the Conficker and ways to detect it and remove it here http://en.wikipedia.org/wiki/Conficker
As always, make sure you keep your systems up to date with the latest security updates/patches and always use an anti-virus system; Avast, Avira and AVG are examples of free antivirus programs for personal use.
